```

```
Scenario: Divide positive numbers greater than 0 # calculadora2022/division.feature:3
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to divide 14 by 7 # calculadora2022.StepDefinitions.i want to divide (double,double)
  Then I should receive a correct 2 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario: Trying to divide by zero # calculadora2022/division.feature:7
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to divide any number by zero # calculadora2022.StepDefinitions.i want to divide any number by zero()
  Then I should not be able to divide by zero # calculadora2022.StepDefinitions.i should not be able to divide by zero()

Scenario: Compute the factorial of a number greater than 0 # calculadora2022/factorial.feature:2
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to compute the factorial of 4 # calculadora2022.StepDefinitions.i want to compute the factorial of(int)
  Then I should receive a correct integer 24 # calculadora2022.StepDefinitions.i should receive a correct integer(int)

Scenario: Determine if a number greater than 1 is prime # calculadora2022/isPrimeNumber.feature:2
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to know if 5 is prime # calculadora2022.StepDefinitions.i want to know if is prime(int)
  Then The program should identify it is a prime number # calculadora2022.StepDefinitions.i should receive true()

Scenario: Multiply positive numbers # calculadora2022/multiplicacion.feature:3
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to multiply 8 and 8 # calculadora2022.StepDefinitions.i want to multiply_and(double,double)
  Then I should receive a correct 64 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Subtract a positive amount from a positive number # calculadora2022/resta.feature:10
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 2 value 2 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct 0 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Subtract a positive amount from a positive number # calculadora2022/resta.feature:11
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 0 value 0 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct 0 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Subtract a positive amount from a positive number # calculadora2022/resta.feature:12
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 8 value 1 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct 7 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Subtract a positive amount from a positive number # calculadora2022/resta.feature:13
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 3 value 4 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct -1 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Subtract a positive amount from a positive number # calculadora2022/resta.feature:14
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 1 value 0 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct 1 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Subtract a positive amount from a positive number # calculadora2022/resta.feature:15
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 20 value 100 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct -80 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario: Subtract a negative amount from a positive number # calculadora2022/resta.feature:17
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to subtract from 8 value -5 # calculadora2022.StepDefinitions.i want to subtract from value(double,double)
  Then I should receive a correct 13 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding two positive real numbers without decimals # calculadora2022/suma.feature:11
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 2 and 2 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 4 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding two positive real numbers without decimals # calculadora2022/suma.feature:12
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 0 and 0 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 0 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding two positive real numbers without decimals # calculadora2022/suma.feature:13
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 1 and 1 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 2 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding two positive real numbers without decimals # calculadora2022/suma.feature:14
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 3 and 3 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 6 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding two positive real numbers without decimals # calculadora2022/suma.feature:15
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 1 and 0 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 1 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding two positive real numbers without decimals # calculadora2022/suma.feature:16
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 20 and 100 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 120 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding one positive real number and one negative real number with decimals # calculadora2022/suma.feature:25
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add -1 and 2 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 1 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding one positive real number and one negative real number with decimals # calculadora2022/suma.feature:26
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 0 and 0 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 0 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding one positive real number and one negative real number with decimals # calculadora2022/suma.feature:27
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 1 and -1 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 0 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding one positive real number and one negative real number with decimals # calculadora2022/suma.feature:28
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 3 and -5 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct -5 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding one positive real number and one negative real number with decimals # calculadora2022/suma.feature:29
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add 1 and 0 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 1 # calculadora2022.StepDefinitions.i should receive a correct answer(double)

Scenario Outline: Adding one positive real number and one negative real number with decimals # calculadora2022/suma.feature:30
  Given I have a calculator # calculadora2022.StepDefinitions.i have a calculator()
  When I want to add -20.5 and 140 # calculadora2022.StepDefinitions.i want to add a and b(double,double)
  Then I should receive a correct 119.5 # calculadora2022.StepDefinitions.i should receive a correct answer(double)
